

\_REDUCE TOOL COSTS

# The Walter Reconditioning Service.

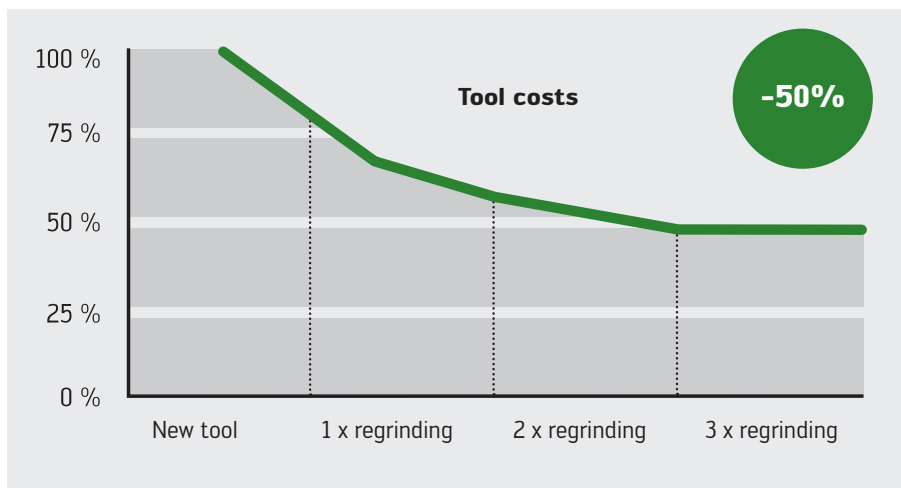

**WALTER TITEX AND WALTER PROTOTYP  
MILLING, DRILLING AND BORING TOOLS  
IN ORIGINAL QUALIT.**

The Reconditioning Service for Walter Titex and Walter Prototyp tools makes a significant contribution to the reduction of your production costs. On the one hand you receive tools as good as new for approx. one third of the price new. On the other hand, if reground three times you save around 50% of the tool costs – especially in case of high value, high-tech tools.

**This means:  
100% original quality, 50% less costs.**

**Regrinding & recoating pays off:**

\_REDUCE TOOL COSTS

# Simple, on-time and to the highest quality

With Walter Multiply, your tools will be "as good as new" Discerning customers expect 100 %, particularly when it comes to high-performance tools, and for us, this even includes reconditioning. Walter Multiply returns your tools to a "like new" condition. This is a step-by-step process, ranging from grinding all the way up to final coating. Tough practical deployments have shown that these reconditioned tools offer full performance. Walter Multiply is worthwhile because every time you have your tools reconditioned, you are also increasing their service life.

- Original geometry and coating
- Certified reconditioning cycles
- Stable production processes
- thanks to consistent tool life
